SUMMARY

Results-driven Data Analyst with hands-on experience in SQL, Python, Power BI, Tableau, and Advanced Excel. Proficient in data collection, data cleaning, EDA, statistical modeling, and KPI dashboard development. Skilled in data visualization, business intelligence reporting, and stakeholder communication to deliver actionable insights that support data-driven decision making.

TECHNICAL SKILLS

Advanced Excel	- Pivot Tables & Power Query - VLOOKUP, XLOOKUP, INDEX-MATCH - Dynamic Charts & Conditional Formatting - Data Validation & KPI Dashboards - Macros & Financial Modeling	SQL	- MySQL, SQL Server - Joins, Subqueries, CTEs - Window Functions (ROW_NUMBER, RANK) - Stored Procedures & Indexing - Query Optimization
Power BI	- DAX & Data Modeling - Calculated Columns & Measures - KPI Visuals, Slicers & Drill-through - Interactive Dashboards & Trend Charts - Power Query & BI Reporting	Python	- Pandas, NumPy - Matplotlib, Seaborn, Plotly - EDA & Data Wrangling - Feature Engineering - Statistical Modeling
Tableau	- Interactive Dashboards - Calculated Fields & Parameters - Filters & Data Connections - Bar, Line & Scatter Charts - Visual Storytelling	Statistics	- Descriptive & Inferential Statistics - Probability Theory - Hypothesis Testing - Correlation & Regression Analysis - Linear Algebra & Normalization
Data Wrangling	- Data Cleaning & Transformation - Handling Missing Values - Data Merging & Aggregation - Root Cause Analysis - A/B Testing	Soft Skills	- Analytical Thinking & Problem Solving - Critical Thinking & Communication - Presentation & Storytelling with Data - Collaboration & Teamwork - Adaptability & Time Management

EXPERIENCE

Data Analyst Trainee <i>Cedlearn</i>	Oct 2024 – Jan 2025 <i>Hyderabad, India</i>
- Collected, cleaned, and transformed 50,000+ records across 5+ datasets using SQL (Joins, CTEs, Window Functions) — reduced data preparation time by 35%. - Conducted end-to-end EDA using Python (Pandas, NumPy, Matplotlib, Seaborn) on 5+ datasets — identified 10+ actionable patterns to support data-driven decisions. - Designed 3+ Power BI dashboards with 8+ DAX measures, KPI visuals, and slicers — enabling 4 stakeholders to monitor metrics 30% faster. - Built 4+ Excel analytical reports using Pivot Tables, Power Query, VLOOKUP, and XLOOKUP — cut manual processing time by 40%. - Produced 6+ insight reports via root cause and correlation analysis — improved data interpretation accuracy by 20% for non-technical stakeholders. - Created 5+ Tableau dashboards with calculated fields and filters — improved team data comprehension by 25% through visual storytelling.	

- Applied descriptive statistics and correlation analysis to interpret dataset behavior and communicate insights to both technical and non-technical audiences.

PROJECTS

Customer Churn Risk Analysis Dashboard | *Power BI · SQL · Excel · DAX* | Live Demo

- Analysed **10,000+ customer records** using SQL extraction and Excel data wrangling to identify churn patterns through behavioural segmentation and retention analysis.
- Built an interactive Power BI dashboard with **8+ DAX measures**, KPI cards, and drill-through reports — reduced stakeholder access time to churn insights by **20%**.
- Identified **3 key churn drivers** via root cause analysis — helped business teams prioritise high-risk segments and improve retention rate by **15%**.

Placement Analysis Dashboard | *Python · Tableau · Excel · Scikit-learn* | Live Demo

- Analysed **500+ student records** using Python (Pandas, NumPy) for data wrangling, statistical analysis, and aggregation — visualised salary distribution, placement rates, and hiring trends.
- Built Tableau dashboards with calculated fields and filters — presented hiring trend and salary benchmarking to **10+ stakeholders**, improving comprehension by **25%**.
- Developed classification models (Logistic Regression, Decision Trees) in Python with cross-validation to predict placement outcomes with **82% accuracy**.
